PROFESSIONAL SUMMARY

Senior software engineer with 4+ years building and owning production systems. Looking for a backend or full-stack role with ownership of complex systems. Brings a founder's mindset, direct client delivery and AI-assisted development.

TECHNICAL SKILLS

Languages: Python, C#, C++, JavaScript, SQL

Backend & DB: Django, DRF, ASP.NET, REST APIs, System design, DSA, PostgreSQL, MySQL, SQL Server, Elasticsearch

AI: Vector DB, Retrieval, Claude Code - learning LLMs and RAG with LangChain, Pydantic and LangGraph agents

Frontend & tooling: React, TypeScript, jQuery, HTML5, CSS3, Docker, CI/CD, GitHub Actions, Google Cloud, Pytest, Git

WORK EXPERIENCE

Senior Software Engineer - Aziro (formerly MSys Technologies)

Dec 2025 – Present

- Sole engineer on an enterprise client account, owning scoping, HLD/LLD, build, test, documentation and handover.
- Raised Top-1 accuracy of a two-stage visual retrieval system from 41.9% to 97.7% by growing the feature-based reranker from 3 to 8 features and tuning it against MRR, with CLIP ViT-B/16 embeddings in Qdrant handling recall.
- Delivered a config-driven Python desktop CAD validation platform end to end, with DXF parsing, 2D computational geometry, PySide6 and a JSON rule engine, automating 3+ manual workflows.
- Built floor-plan variations, 25 per room layout, that move doors and windows and heal 2D geometry by rebuilding walls and rooms, integrated a client system, and agreed changes and configurations directly with the client.

Co-Founder & Game Developer - UnKI Games

Jun 2024 – Dec 2025

- Shipped Pen Fight 2D, a turn-based multiplayer game in Unity and C#, to 10K+ downloads and 500+ MAU.
- Built a server-authoritative economy in server-side JavaScript on Unity Cloud Code for shop, assets and upgrades.
- Architected real-time multiplayer and friend challenges on Unity Lobby and Relay, and built a master-follower physics simulation that handles race conditions on nearly every action.

Software Engineer - Zenoti

Aug 2022 – May 2024

- Became primary code reviewer in just over a year, requesting changes on 25+ of 50+ PRs including work approved by senior staff, and flagged 40+ changes that would have become defects.
- Designed and owned a localization abstraction layer for a 500+ page C# and ASP.NET product in 5+ languages, with providers switchable by configuration, per-element opt-out and coverage through the API and database layers.
- Delivered 5 client-specific and 2 core features end to end, and 2 of them were adopted into the core product.
- Restored SQL queries degraded 2 to 3x to near-baseline response times with no downtime on a live system.
- Removed a data-loss risk by rewriting legacy stored procedures, one of them 4,000 lines, to use differential updates.

Software Engineer Intern - Zenoti

Feb 2022 – Aug 2022

- Extended a hierarchical permission model as a 2-week proof of concept and shipped UI changes in a full redesign.

PROJECTS

[HackerRank Orchestrate](#) - Ranked 224 of 3,062 (top 8%) in the September 2026 edition, a 24-hour AI agent hackathon.

[XpenseSplitter](#) - Client-side React expense splitter for trips, where a trip travels as a JSON file or a share link.

[CreatorHub](#) - Personal multi-tenant Django and React agency platform, designed by me and built with Claude Code.

EDUCATION

MCA, Computer Applications - Vellore Institute of Technology (2020 – 2022) · GPA 8.74/10

B.Sc., Information Technology - St. Xavier's College, Ranchi (2017 – 2020) · GPA 8.26/10
